1 **Special Condition # 16:** You shall abstain from the use of illegal controlled substances, and shall submit to urinalysis testing, as directed by the supervising probation officer.

Supporting Evidence: Douglas Dorton is considered in violation of his period of supervised release in the Eastern District of Washington by using a controlled substance, cocaine, on or prior to August 8, 2005.

On August 8, 2005, the defendant reported for a random drug testing at Second Chance in Pasco. He admitted the sample would return positive for cocaine. The sample was confirmed positive on August 12, 2005.

U.S. Probation Officer Action:

On August 8, 2005, the defendant stated he wanted a chance to enter drug treatment to address his addiction. He was directed to contact the Benton/Franklin Assessment Center to complete an assessment for treatment. The defendant contacted the Assessment Center but found he was not eligible due to his income. He then contacted Life Changes and was assessed as being in need of out patient drug treatment. The defendant will pay for this treatment on his own. The defendant also changed his residence and is now living at an Oxford House which is focused on helping individuals who are attempting to address their drug addictions. The house will also require the defendant to provide random drug testing to remain in the home.

As the Court is aware, the defendant also requested a modification to his supervised release to add a condition for mental health treatment. On August 15, 2005, the Court agreed to modify the defendants conditions. At this time the defendant will be referred for mental health treatment to address any anger management issues at the defendants request.

Currently the defendant is addressing his drug addiction and mental health issues. He has taken steps to remove himself from surroundings which may have a negative impact on his life and he seems motivated to succeed. For these reasons it would be respectfully recommended no action be taken at this time.

Respectfully submitted,
